

City of Gainesville, Florida

University of Florida Cost Analysis Memorandum

OCTOBER 2016

Presented by:

Government Services Group, Inc.
1500 Mahan Drive, Suite 250
Tallahassee, Florida 32308
(850) 681-3717 (Office)
(850) 224-7206 Fax

Background

The City of Gainesville (City) has engaged Government Services Group, Inc. (GSG) to assist the City in analyzing the alternative methods that could be used to determine the full cost of fire rescue services provided to the University of Florida properties within the City. GSG specializes in government finance and taxation issues.

The objectives of this effort were to:

- Determine the full costs of providing fire services to University of Florida properties within the City by analyzing alternative methodologies.
- Calculate the fire services charges for the aggregate University of Florida properties within the City based on the alternative methodologies.

The City of Gainesville's Fire Rescue Department is an all hazards emergency and non-emergency service provider. This organization provides fire suppression, emergency medical services (EMS at an advanced life support (ALS) level), hazmat response, technical rescue, state disaster mutual aid response, fire prevention inspections and life safety education. The City of Gainesville has provided high quality services for over 100 years and currently enjoys an Insurance Services Office (ISO) Class 2/2x rating effective September 1, 2014. The Gainesville Fire Rescue Department was awarded accredited status from the Commission on Fire Accreditation International (CFAI) on March 11, 2014. The Fire Rescue Department facilities inventory is comprised of eight fire stations, an administrative office and a training facility that service the entire City.

The City of Gainesville has a very high percentage of City property values that are off of the tax roll in comparison to similar sized municipalities in the state. For tax year 2015 the taxable value of property was 42% of total just value compared to a statewide average of 68%. This constrains the City's property tax revenue and highlights the necessity for additional revenue sources such as the fire assessment.

GSG initially identified six methodologies for the analysis of the full costs of providing fire rescue services to University of Florida properties.

- Building Square Footage Method
- Fire Call Method
- Factored Fire Protection Unit Method
- Land Mass Method
- Assessment Model Method
- Response Method

All six methods were considered at a high level with two being chosen for further development and four determined to be alternative methods for comparison.

Alternative Methods for Comparison

BUILDING SQUARE FOOTAGE METHOD

The Building Square Footage Method calculates the proportionate share of the burden of maintaining the Fire Rescue Department that is attributable to the University of Florida by dividing the campus's total building square footage by the total square footage of all buildings in the City of Gainesville (including the University buildings). Based on data obtained by GSG from the property appraiser and the client, the University of Florida campus (22,360,629 ft²) comprises 15% of the total square footage of the buildings in the City of Gainesville (147,506,471 ft²). Applying this percentage to the total Fire and EMS budget of the Fire Rescue Department (\$16,702,920) is one method used to calculate the costs of providing fire services to the University of Florida and would equal \$2,532,010.

FIRE CALL METHOD

The Fire Call Method calculates the proportionate share of the burden of maintaining the Fire Rescue Department that is attributable to the University of Florida by dividing the number of fire related calls originating from the University of Florida in a year by the total fire related calls generated by the City of Gainesville (including the University) in the same year. Based on data extracted from the Florida Fire Incident Reporting System (FFIRS) the total number of calls for the University of Florida and the City of Gainesville for 2014 were 1,429 and 18,162 respectively with the University comprising 8% of the total. Applying this percentage to the total Fire and EMS budget of the Fire Rescue Department (\$16,702,920) is another method used to calculate the costs of providing fire services to the University of Florida and would equal \$1,314,198.

FACTORED FIRE PROTECTION UNIT METHOD

The Factored Fire Protection Unit (FFPU) Method calculates the proportionate share of the burden of maintaining the Fire Rescue Department that is attributable to the University of Florida by dividing the number of FFPU's attributable to the University of Florida by the total FFPU's calculated for the City of Gainesville (including the University) for the same period. For details concerning the calculation of Factored Fire Protection Units please refer to the Assessment Model Method section of this report. Based on data calculated by GSG, the total number of FFPU's for the University of Florida and the City of Gainesville were 4,226 and 67,215 respectively with University comprising 6% of the total. Applying this percentage to the total Fire and EMS budget of the Fire Rescue Department (\$16,702,920) is another method used to calculate the costs of providing fire services to the University of Florida and would equal \$988,123.

LAND MASS METHOD

The Land Mass Method calculates the proportionate share of the burden of maintaining the Fire Rescue Department that is attributable to the University of Florida by dividing the total land mass of the property of the University of Florida by the total land mass of the City of Gainesville (including the University). Based on data extracted from the GIS system by GSG, the University of Florida has a mass of 1,930 acres and the City of Gainesville a mass of 38,745 acres with the University of Florida comprising 5% of the total. Applying this percentage to the total Fire and EMS budget of the Fire Rescue Department (\$16,702,920) would equal \$792,573 and is yet another method used to calculate the costs of providing fire services to the University of Florida.

Developed Methods

Two of the six analysis methodologies were chosen for detailed development. The first of these methods applies the City's current, approved fire assessment methodology to the University of Florida properties and calculates the fire services charges for the aggregate University of Florida properties within the City based on the City's approved fire assessment rate per Factored Fire Protection Unit for Fiscal Year 2015-16; this method is the Assessment Model Method. The second method uses the compensatory amount per unit response provided within the Fire Services Assistance Agreement between Alachua County and the City of Gainesville for Fire Rescue Services approved in October 2006 (Fire Services Assistance Agreement) as well as the costs for excessive false alarms included within the City's Municipal Code; this method is the Response Method.

ASSESSMENT MODEL METHOD

The Assessment Model Method applies the City's current fire assessment methodology to the University of Florida properties. GSG updated the fire assessment methodology for the City in 2014 based on a prior study conducted by GSG in 2010. The fire assessment rate imposed since inception of the assessment program and for Fiscal Year 2015-16 is \$78.00 per Net Factored Fire Protection Unit. This rate is based on the City only funding 39% of the Assessable Budget (which itself was 66% of the Total Fire and EMS Budget in 2015) via the fire assessment. For 2015, if the City had collected 100% of the Assessable Budget of \$13,456,869, the rate per FFPU would have been \$164.76.

The assessment methodology is based upon the development of a base-billing unit, called a Fire Protection Unit. A Fire Protection Unit is a measure that serves as a common index to compare the fire flow requirements for each building within the City; each Fire Protection Unit equates to the Fire Rescue Department's capability to effectively deliver 300 gallons per minute (GPM) of effective fire flow, which equates to the City's initial full alarm response. The Fire Protection Unit assignments vary for each building within the City based upon each building's occupancy hazard classification(s) (Hazard Class) and building area calculated in square foot increments of building improvements as described subsequently.

Based upon NFPA 1142 standards, a Hazard Class was assigned to each building within the City based upon the building's assignment of use by the County Property Appraiser or verification of use obtained through field research. According to NFPA 1142, the lowest Hazard Class number is 3, and it is assigned to the highest (most hazardous) hazard group. The highest Hazard Class number is 7, and it is assigned to the lowest (least hazardous) hazard group. For example, Hazard Class 3 properties include plywood and particleboard manufacturing, plastic processing and cereal or flour mills while Hazard Class 7 properties include residential dwellings, apartments and offices.

In addition, for all parcels within the City, GSG determined the amount of square footage of the structures using the building files on the ad valorem tax roll or through the use of field research. Using the fire flow calculation from NFPA 1142, a Fire Protection Unit was assigned to each square foot increment by Hazard Class. The number of Fire Protection Units assigned to a building represents that building's proportionate share of the burden of maintaining the Fire Rescue Department and the availability of these vital public services. The number of Fire Protection Units assigned to a building was determined by the Hazard Class assignment and the amount of building area contained in a building.

Next, the Fire Protection Units assigned to each building were further modified by applying a Combined Factor for each Hazard Class to determine the Factored Fire Protection Units for each Building. The Combined Factor is comprised of the Demand Factor and the Availability Factor for each Hazard Class.

The Factored Fire Protection Units were adjusted for sprinklered buildings to account for any mitigation the sprinklers might provide for the fire services. A mitigation credit policy was implemented when the fire assessment program was initiated in 2010 and is based on the sprinklered building information provided by individual property owners through an annual application process. Under the Fire Flow Mitigation Credit Policy, the number of Factored Fire Protection Units are reduced by 10% upon documentation and proof that the building is protected by an automatic sprinkler system that fully meets the requirements of NFPA 12, NFPA 13D or NFPA 13R and that the system was installed, inspected, monitored and maintained in accordance with the City standards.

A complete description of the Assessment Methodology is provided in the City of Gainesville Fire Assessment Memorandum dated June 2014.

For the University of Florida analysis, the City obtained a list of all of the buildings on University of Florida properties, and their related square footage, from the University of Florida. Using the properties' physical address, GIS technology or field work, GSG identified all properties within the municipal boundaries of the City. Next, GSG analyzed each building and assigned a Hazard Class to the building based upon the building's use determined by building name, internet research, or personal knowledge¹. GSG only included buildings with more than 100 square feet. GSG assigned a Hazard Class 7 to any buildings where the building's use could not be determined, which is the least hazardous class. Once the Hazard Class assignment was made, GSG assigned the number of Factored Fire Protection Units for each building using the square footage of the building supplied by the University of Florida and the NFPA formula.

Finally, GSG calculated each building's fire service charge by applying the 100% rate of \$164.76. If the fire assessment were to be approved at a level of 100% funding of the Assessable Budget the rate would be \$164.76 per Factored Fire Protection Unit and the total assessment revenue generated would be \$696,277. The results of the Assessment Model Method analysis for each building using this rate are provided as Appendix A. The total number of Factored Fire Protection Units for the University of Florida properties is 4,226.38 units.

The results of the Assessment Model Method analysis for the University of Florida properties may be further modified once the mitigation credits are applied to the Factored Fire Protection Units, but information on the sprinklered buildings was not available at the time of the analysis.

RESPONSE METHOD

The Response Method uses the compensatory amount per unit response provided within the Fire Services Assistance Agreement as well as the charges for excessive false alarms included within the City's Municipal Code as Appendix A - Schedule of Fees, Rates and Charges.

As previously discussed, the City has a Fire Services Assistance Agreement with Alachua County for fire services. The intent of the agreement is to provide the most efficient service utilizing the fire services units nearest the incident and it is intended to provide the most efficient fire services to properties within the City of Gainesville. The Fire Services Assistance Agreement has an established formula for

¹ Hazard Class verification.

determining the costs associated with these services and provides for monthly reimbursement for the responses. The current compensatory amount per unit response is \$795.03.

The City has also adopted an ordinance that provides penalties for excessive false alarms. The penalties for false alarms are as follows:

- First with valid permit \$ 0.00
- First without valid permit, or second with valid permit, each \$150.00
- Third and fourth, each \$200.00
- Fifth, sixth and seventh, each \$400.00
- Eighth and above, each \$800.00
(Note: reduced to \$11.50 if false fire alarm caused by system malfunction and proof of timely service/repair is submitted to the False Alarm Reduction Unit (section 10-33(d))
- Non-permitted system, additional fee \$255.25
(Note: reduced to \$61.00 if application filed within 10 days (section 10-33))
- Fire alarm permit reinstatement fee after revocation (section 10-34) \$ 64.00
- Failure to respond when requested by the Fire Rescue Department (section 10-36) \$ 64.00
- Resetting of an activated fire alarm prior to receiving approval from the Fire Rescue Department \$159.50
- Failure to deactivate fire alarm within 15 minutes (section 10-37) \$159.50

GSG obtained the call information from the City of Gainesville for calendar years 2013 and 2014. The City's Fire Rescue Department identified all calls to the University of Florida properties using the Computer-Aided Dispatch (CAD) system, GIS technology or fieldwork.

The Fire Services Assistance Agreement has an established formula for determining the costs associated with the fire and EMS calls based on a per unit response with the exception of the responses by the District Chief. The current compensatory amount per unit response is \$795.03. Table 1 provides a summary of the unit responses to University of Florida properties based on four major response categories for 2013 and 2014 (excluding responses by the District Chiefs), as well as the fees associated with the unit responses based on the current amount of \$795.03.

**Table 1
Unit Responses for 2013 and 2014**

	2013		2014	
	Unit Responses	Fees	Unit Responses	Fees
Fire/False Alarm Responses	613	\$487,353.39	584	\$464,297.52
EMS Responses	652	\$518,359.56	781	\$620,918.43
Service Responses	6	\$4,770.18	5	\$3,975.15
Hazard Responses	53	\$42,136.59	59	\$46,906.77
Totals	1,324	\$1,052,619.72	1,429	\$1,136,097.87

Based on the penalties for excessive false alarms adopted by the City, the false alarm calls were further analyzed to determine if any of the properties were experiencing excessive false alarm calls. The analysis for each year for each property is provided as Appendix B. Based on the analysis, it was determined that the cost for excessive false alarms in 2013 was \$41,850 and in 2014 was \$42,200.

The costs for the excessive false alarms was added to the unit response costs in Table 1 to determine the total charges under the Response Method analysis; the total charges are illustrated in Table 2 for calendar years 2013 and 2014.

Table 2
Response Method Analysis

	2013		2014	
	Unit Responses	Fees ¹	Unit Responses	Fees ¹
Fire/False Alarm Responses	613	\$487,353.39	584	\$464,297.52
EMS Responses	652	\$518,359.56	781	\$620,918.43
Service Responses	6	\$4,770.18	5	\$3,975.15
Hazard Responses	53	\$42,136.59	59	\$46,906.77
False Alarm Ordinance Fees	427 ²	\$41,850.00	451 ²	\$42,200.00
Total	1,751	\$1,094,469.72	1,880	\$1,178,297.87

¹Fees for unit responses are based on the automatic aid compensatory amount per unit.

False Alarm responses have an additional fee based on the City's false alarm ordinance.

² Represents False Alarm Incidents not Unit Responses.

Summary

GSG considered six methodologies to use for the analysis of the full costs of providing fire services to University of Florida properties. Table 3 provides a side by side summary of the methods displaying key factors for each. Of note is the similarity of the values for the percentage that the University of Florida makes up of the total City whether comparing units used as criteria for a method or the resulting assessment revenue from a method.

**Table 3
Method Comparison**

	Building Sq. Ft	Number of Fire Calls	FFPUs	Land Mass (Acres)	Assessment Model²	Response Method
City of Gainesville	125,145,842	16,733	67,215	38,745	\$11,074,360	\$16,702,920
University of Florida	22,360,629	1,429	4,226	1,930	\$696,338	\$1,178,298
City + UF Total	147,506,471	18,162	71,441	40,676	\$11,770,698	\$17,881,218
UF % of Total	15%	8%	6%	5%	6%	7%
UF Assessment	\$2,532,010	\$1,314,198	\$988,123	\$792,573	\$696,338	\$1,178,298

² The Assessment Model Method is based on only funding the 66% of the total City Fire and EMS budget of \$16.7M that is identified as fire related (\$11M) via the fire assessment. The remaining non-assessable portion (\$5.6M) of the budget, while still required for availability and operation of the Department as a whole, would be funded via the General Fund.
