

Citizens' Guide to Streetlights

- How does the City determine where to install streetlights?

Streetlights are installed in accordance to the *City of Gainesville Standard Practice for Public Lighting* along public roadways to promote safety of all users.

Along local residential streets, the standard lighting requirement includes lighting fixtures at critical areas such as intersections, high volume driveway connections and curves. Mid-block fixtures are generally installed every 200 to 300 feet.

- How do I request a repair or report a streetlight outage?

Use GRU's online [streetlight repair request form](#) or call (352) 334-3434. When possible, include the pole number with the request.

- How do I request the installation, alteration, or removal of a streetlight?

In the City of Gainesville: contact the City of Gainesville Public Works Department at (352) 334-5070 or pubwrk@cityofgainesville.org.

Outside city limits: contact Alachua County Public Works Department at (352) 374-5245.

- How can I get a streetlight if my street is already up to standard, not a public street or I have a non-roadway lighting issue?

GRU offers rental lights for residential and commercial customers. Find more information on the GRU [website](#) or call (352) 334-3434.
